

Steps for Local Health Department Staff to Submit New Outbreaks and Clusters to Communicable Disease Branch using REDCap

REDCap is being used to collect outbreak and cluster information from Local Health Departments to ensure more complete information is obtained. This eliminates the need to submit CD Outbreak Worksheets. The following two steps will allow local staff to notify the communicable disease branch about outbreaks and clusters with more complete information. All subsequent updates should be made in NC COVID.

1. Go to this REDCap link (<https://is.gd/COVIDOutbreaks>) to submit your initial outbreak/cluster information. A login is not required.
2. Complete the survey and then select “Submit” at the bottom of the screen.

NOTE: You will have the option to create a PDF of your submission after selecting “Submit”. See dotted circle in screenshot below.

Close survey

Thank you for your outbreak or cluster report. You will receive an email within 24hrs with your NC COVID outbreak ID.

Once you have received your outbreak ID, please link all associated cases and provide any updates to this outbreak in NC COVID. DO NOT resubmit this form with outbreak updates.

If you do not receive an outbreak ID or have any questions, please call the epi on call at 919-733-3419.

Have a nice day!

Download your survey response (PDF): 

The following information will be requested in the survey. Required fields are marked with an asterisk “*”.

Submitter Information

1. Submitter name*
2. Submitter email address*
3. Submitter phone number*
4. Submitter County*

Outbreak/Cluster Facility Information

5. Outbreak/Cluster Facility Name*
6. Outbreak/Cluster Facility Address *(this is especially important for nursing homes, adult care homes, residential care homes, etc. so that we can be assured we’re referencing the proper facility)*

Outbreak/Cluster Information

7. Date outbreak identified by LHD
8. Has this facility previously had a COVID-19 outbreak or cluster?
 - If Yes, what was the NC COVID ID# for the previous outbreak?
9. Is this an outbreak or a cluster? * *Definitions are provided in the survey.*
 - Type of setting *(You can choose from the drop down menu listed below)*

Type of OUTBREAK classification in drop down menu
Nursing home facility
Residential care facility
Correctional facility
Shelter
Migrant worker housing
Other

Type of CLUSTER classification in drop down menu	
Agriculture	Food Service
Camp	Government
Childcare	Hospital
Church	Independent Living
Clinic	Manufacturing
College or University	Meat Processing
Community Event	Other
Construction or Contractor	Private Event
Doctor's Office	School
Food Processing or Packaging	Substance use rehabilitation

10. First date of symptom onset (or specimen collection date if asymptomatic)
11. Most recent date of symptom onset (or specimen collection date if asymptomatic)

Cases in residents/students/patrons

12. Total number of residents/students/patrons in setting
13. Number of exposed residents/students/patrons
14. Number of laboratory confirmed residents/students/patrons*
15. Number of hospitalized residents/students/patrons
16. Number of deaths in residents/students/patrons

Cases in faculty/staff/employees

17. Total number of faculty/staff/employees in setting
18. Number of exposed faculty/staff/employees
19. Number of laboratory confirmed faculty/staff/employees*
20. Number of hospitalized faculty/staff/employees
21. Number of deaths in faculty/staff/employees

Response and follow-up

22. This is a high profile outbreak that may attract media attention (Y/N)
23. The LHD would like a call with the state outbreak team to discuss this outbreak (Y/N)
24. Resource requests were entered into WebEOC for this outbreak (Y/N)
25. Notes *(Text box)*
